

BISHOP WOOD C of E JUNIOR SCHOOL
GEOGRAPHY POLICY

1 Aims and objectives

1.1 Geography teaches an understanding of places and environments. Through their work in geography, children learn about their local area, and they compare their life in this area with that in other regions in the United Kingdom and in the rest of the world. They learn how to draw and interpret maps, and they develop the skills of research, investigation, analysis and problem-solving. Through their growing knowledge and understanding of human geography, children gain an appreciation of life in other cultures. Geography teaching also motivates children to find out about the physical world, and enables them to recognise the importance of sustainable development for the future of mankind. Geography helps to promote citizenship. Children develop concern and a responsibility for the care of the environment.

1.2 The objectives of teaching geography in our school are:

- to enable children to gain knowledge and understanding of places in the world;
- to increase children's knowledge of other cultures and, in so doing, teach a respect and understanding of what it means to be a positive citizen in a multi-cultural country;
- to allow children to learn graphic skills, including how to use, draw and interpret maps;
- to enable children to know and understand environmental problems at a local, regional and global level;
- to encourage in children a commitment to sustainable development, and an appreciation of what 'global citizenship' means;
- to develop in children a variety of other skills, including those of enquiry, problem-solving, ICT, investigation, and that of presenting their conclusions in the most appropriate way.

2 Teaching and learning style

2.1 We use a variety of teaching and learning styles in our geography lessons. We believe in whole-class teaching methods, and we combine these with enquiry-based research activities. Sometimes the children work in groups or mixed ability pairs. We encourage children to ask as well as answer geographical questions. We offer them the opportunity to use a variety of data, such as maps, statistics, graphs, pictures, and aerial photographs, and we enable them to use ICT in geography lessons where this serves to enhance their learning. Children take part in role-play and discussions, and they present reports to the rest of the class. They engage in a wide variety of problem-solving activities. Wherever possible, we involve the children in 'real' geographical activities, for example research of a local environmental problem, or use of the Internet to investigate a current issue.

2.2 We recognise the fact that there are children of widely different geographical abilities in all classes, and we provide suitable learning opportunities for all children by matching the challenge of the task to the ability of the child. We achieve this by:

- setting tasks which are open-ended and can have a variety of responses;
- setting tasks of increasing difficulty, some children not completing all tasks;
- grouping children by ability in the room, and setting different tasks to each ability group;
- providing resources of different complexity, according to the ability of the child;
- using classroom assistants to support the work of individual children or groups of children.

3 Geography curriculum planning

3.1 We use our own scheme of work as the basis for our curriculum planning, based on the Q.C.A document for geography. We have adapted this to the local circumstances of our school, i.e. we make use of the local environment in our fieldwork and we also choose a locality where the human activities and physical features provide a contrast to those that predominate in our own immediate area.

3.2 Our curriculum planning is in three phases (long-term, medium-term and short-term). Our long-term plan maps the geography topics studied in each term during each key stage. The subject leader devises this plan in conjunction with teaching colleagues in each year group. In some cases we combine the geographical study with work in other subject areas. In other cases we arrange for the children to carry out an independent geographical study.

3.3 We use our scheme of work as the basis for our medium term plans. This gives details of each unit of work for each term. The subject leader reviews these plans on a regular basis.

3.4 Each class teacher plans lessons using the specific learning objectives and outcomes. The scheme of work provides suggestions for activities for each lesson.

3.5 We plan the topics in geography so that they build on prior learning. Children of all abilities have the opportunity to develop their skills and knowledge in each unit and, through planned progression built into the scheme of work, we offer them an increasing challenge as they move up the school.

4 The contribution of geography to teaching in other curriculum areas

4.1 English

Geography makes a significant contribution to the teaching of English in our school because it actively promotes the skills of reading, writing, speaking and listening. We organise debates on environmental issues, because we believe that these develop speaking and listening skills. Reports, letters and recording

information will all develop children's writing ability. We also use environmental issues as a way of developing the children's writing ability, by asking them to record information and write reports and letters.

4.2 Mathematics

The teaching of geography in our school contributes to children's mathematical understanding in a variety of ways. We teach the children how to represent objects with maps. The children study space, scale and distance, and they learn how to use four- and six-figure grid references. They also use graphs to explore, analyse and illustrate a variety of data.

4.3 Personal, social and health education (PSHE) and citizenship

Geography contributes significantly to the teaching of personal, social and health education and citizenship. Firstly, the subject matter lends itself to raising matters of citizenship and social welfare. For example the children learn how environments are changed for better or for worse. Secondly, the nature of the subject means that children have the opportunity to take part in debates and discussions. Geography in our school promotes the concept of positive citizenship.

4.4 Spiritual, moral, social and cultural development

We offer children in our school many opportunities to examine the fundamental questions in life through the medium of geography. For example, their work on environmental issues leads children to ask questions about the evolution of the planet. We encourage the children to reflect on the impact of mankind on our world, and we introduce the concept of 'stewardship' in relation to sustainable development. Through teaching about contrasting localities, we enable the children to learn about inequality and injustice in the world. We help children to develop their knowledge and understanding of different cultures, so that they learn to avoid stereotyping other people, and acquire a positive attitude towards others. We help contribute to the children's social development by teaching them about how society works to resolve difficult issues of economic development. Geography contributes to the children's appreciation of what is right and wrong by raising many moral questions during the programme of study.

5 Geography and ICT

5.1 Information and communication technology enhances our teaching of geography, wherever appropriate, in each key stage. This more than meets the statutory requirement for children to use ICT as part of their geography work in Key Stage 2. Children use ICT to enhance their skills in data handling, and in presenting written work. They research information through the Internet. We also try to arrange for the children to communicate with pupils in other schools and countries via e-mail, and we offer children the opportunity to use the digital camera. Children use mapping software to produce maps.

6 Geography and inclusion

- 6.1** At our school we teach geography to all children, whatever their ability and individual needs. Geography implements the school curriculum policy of providing a broad and balanced education to all children. Through our geography teaching we provide learning opportunities that match the needs of children with learning difficulties, and we take into account the targets set for individual children in their Individual Education Plans. We strive hard to meet the needs of those pupils with special educational needs, those with disabilities and those with special gifts and talents.
- 6.2** When progress falls significantly outside the expected range, the child may have special educational needs. Our assessment process looks at a range of factors – classroom organisation, teaching materials, teaching style, differentiation – so that we can take some additional or different action to enable the child to learn more effectively.
- 6.3** Intervention through School Action and School Action Plus will lead to the creation of an Individual Education Plan (IEP) for children with special educational needs.
- 6.4** We enable all pupils to have access to the full range of activities involved in learning geography. Where children are to participate in activities outside the classroom, such as a visit to the coast, we carry out a risk assessment prior to the activity, to ensure that the activity is safe and appropriate for all pupils.

7 Assessment for learning

- 7.1** Children demonstrate their ability in geography in a variety of different ways. Younger children might, for example, dress up in costumes from a different part of the world, whilst older pupils might hold debates on a public enquiry into the development of a previously untouched stretch of coastline. Teachers will assess children's work by making informal judgements during lessons. On completion of a piece of work, the teacher assesses the work and uses this information to plan future learning. Written or verbal feedback is given to the child to help guide his or her progress. Older children are encouraged to make judgements about how they can improve their own work.
- 7.2** We assess work in geography by making informal judgements as we observe the children during lessons. Once the children complete a piece of work, we mark and comment as necessary. Once they complete a whole unit of work, we make a summary judgement of the work of each pupil. We record the skills and objectives achieved and we use these to plan future work with that pupil, to provide the basis for assessing the progress of the child, and to pass information on to the next teacher and to the parents at the end of the year.
- 7.3** The subject leader keeps samples of the children's work in a portfolio which shows the expected level of achievement in geography in each year of the school.

8 Resources

- 8.1** We have sufficient resources in our school to be able to teach all the geography units in the QCA Scheme of Work. We keep these resources in a central store and in each classroom. A set of atlases is kept in the library as well as a good supply of geography topic books.

9 Fieldwork

- 9.1** Fieldwork is integral to good geography teaching, and we include as many opportunities as we can to involve children in practical geographical research and enquiry.
- 9.2** The children do a study of the local area. We also offer them the opportunity to take part in a residential visit to Norfolk.

10 Monitoring and review

- 10.1** The subject co-ordinator is responsible for monitoring the standard of the children's work and the quality of teaching in geography. The co-ordinator is also responsible for supporting colleagues in their teaching, for being informed about current developments in the subject, and for providing a strategic lead and direction for geography in the school. The co-ordinator gives the head teacher an annual report in which strengths and weaknesses in the subject are evaluated and indicates areas for further improvement. We allocate special time for the vital task of reviewing samples of children's work and for visiting classes to observe teaching in the subject.
- 11.2** This policy will be reviewed at least every two years.
