

YEAR 3 SCIENCE

Working Scientifically

Pupils will be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- asking relevant questions and using different types of scientific enquiries to answer them
- making systematic and careful observations and where appropriate, taking accurate measurements using standard units, using a range of equipment e.g thermometers and data loggers
- gathering , recording, classifying and presenting data in a variety of ways to help answer questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions
- identify differences, similarities or changes related to simple scientific ideas and processes using straightforward scientific evidence to answer question or to support their findings

PLANTS

Working Scientifically Assessment Task - Measuring Plants

Key Vocabulary

roots, stem, leaves, flowers, nutrients, fertilisation, petal, stamen, carpel, germination, photosynthesis, pollen, pollination, pollinator, seed formation, seed dispersal

Working Scientifically Skills

Knowledge

Planning

- set up simple practical enquiries, comparative and

National Curriculum Requirements

- identify and describe the function of different parts of flowering plants: roots, stem, leaves and flowers

<p>fair tests</p> <p>Obtaining and presenting evidence</p> <ul style="list-style-type: none"> ➤ make systematic and careful observations ➤ take accurate measurements using standard units using a range of equipment ➤ gather and record data in a variety of ways ➤ report on findings <p>Considering and evaluating evidence</p> <ul style="list-style-type: none"> ➤ identify differences, similarities or changes related to simple scientific ideas and processes ➤ with help, use results to draw conclusions ➤ use straightforward scientific evidence to answer questions or support their findings ➤ with support, raise further questions 	<ul style="list-style-type: none"> ➤ explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant ➤ investigate the way in which water is transported within plants ➤ explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal <p>Lesson Breakdown:</p> <p>Parts of a Plant</p> <ul style="list-style-type: none"> ➤ identify the main parts of the plant: root, stem, leaves and flower ➤ understand the role of the different plant parts and how they are suited to their functions ➤ be introduced to structures that are only found in some plants e.g bulbs and runners <p>What do Plants Need to Grow Well?</p> <ul style="list-style-type: none"> ➤ explore the requirements of plants for life and growth <p>Moving Water</p> <ul style="list-style-type: none"> ➤ investigate the way water is transported within plants by observing the transport of food colouring through a stem <p>Reproduction in Flowering Plants</p> <ul style="list-style-type: none"> ➤ identify, name and understand the functions of the main parts of a flowering plant involved in the reproductive process ➤ understand the meaning of pollination ➤ understand the role of insects, birds and the wind in the process of pollination
--	--

	Fertilisation and Dispersal <ul style="list-style-type: none"> ➤ understand that fertilisation takes place when pollen and ovules fuse together to form seeds ➤ Understand that, in some plants, fertilisation causes the ovary to swell to produce fruit ➤ Know that seed dispersal is important as it increases a species chances of survival ➤ Identify a range of methods by which seeds can be dispersed
<p style="text-align: center;">ANIMALS (including humans)</p> <p style="text-align: center;">Working Scientifically Assessment Task - Model Skeletons and / or Researching Skeletons</p>	
<p style="text-align: center;">Key Vocabulary</p> <p>healthy, nutrition, nutrients, energy, carbohydrates, sugars, protein, vitamins, minerals, fibre, fats (saturated and unsaturated), water, vertebrate, invertebrate, skeleton, bones, muscles, tendons, joints, support, protect, move, skull, ribs, spine</p>	
Working Scientifically Skills	Knowledge
Planning <ul style="list-style-type: none"> ➤ ask relevant questions and use different types of scientific enquiries to answer them Obtaining and presenting evidence	<p>National Curriculum Requirements</p> <ul style="list-style-type: none"> ➤ identify that animals, including humans, need the right types and amount of nutrition and that they cannot make their own food; they get nutrition from what they eat ➤ identify that humans and some animals have skeletons and muscles for support, protection and movement <p>Lesson Breakdown:</p>

- gather and record data in a variety of ways
- report on findings

Considering and evaluating evidence

- with support, raise further questions

Diet and Exercise

- understand the components of a healthy, balanced diet, including carbohydrates, proteins, fats, vitamins and minerals, fibre and water
- be able to provide examples of foods that are good sources of each of the different food groups
- understand some of the problems associated with an unbalanced diet, including over- and under-eating
 - appreciate the importance of exercise in maintaining healthy body function

The Human Skeleton

- identify and name the major bones of the human skeleton
 - understand that the purpose and function of the skeleton is to protect internal organs, support the body and allow movement
 - know how and why the skeletons of different animals vary
 - be introduced to the terms vertebrate, invertebrate, exoskeleton and endoskeleton
 - understand how the human skeleton has changed (evolved) over time, and the advantages and disadvantages of being on two feet rather than four

Joints and Muscles

	<ul style="list-style-type: none"> ➤ be able to identify the role of muscles in moving the body ➤ understand that muscles work in pairs, contracting and relaxing, to move the bones ➤ know that muscles are attached to bones with tendons ➤ know that some muscles move involuntarily, such as the heart or diaphragm ➤ be able to locate different types of joint on a human skeleton
<p style="text-align: center;">ROCKS</p> <p style="text-align: center;">Working Scientifically Assessment Task - Testing Soil</p>	
<p style="text-align: center;">Key Vocabulary</p> <p>rock, igneous, sedimentary, metamorphic, magma, lava, stone, pebble, boulder, grain, crystals, layers, hard, soft, texture, absorb, soil, fossil, marble, chalk, granite, sandstone, slate, soil, peat, sandy/chalk/clay soil, permeable, impermeable, fossilisation, paleontology, erosion</p>	
Working Scientifically Skills	Knowledge
<p>Planning</p> <ul style="list-style-type: none"> ➤ set up simple practical enquiries, comparative and fair tests <p>Obtaining and presenting evidence</p> <ul style="list-style-type: none"> ➤ make accurate measurements using 	<p>National Curriculum Requirements</p> <ul style="list-style-type: none"> ➤ compare and group together different kinds of rocks on the basis of their appearance and simple physical properties ➤ describe in simple terms how fossils are formed when things have lived are trapped within rock ➤ recognise that soils are made from rocks and organic matter <p>Lesson Breakdown:</p>

<p>standard units using a range of equipment</p> <ul style="list-style-type: none"> ➤ record and present findings using drawings, labelled diagrams, keys, tally charts, Carroll diagrams, Venn diagrams, bar charts and tables <p>Considering and evaluating evidence</p> <ul style="list-style-type: none"> ➤ with help, use results to draw simple conclusions ➤ with support, use results to suggest improvements on what has been done 	<p>Types of Rocks</p> <ul style="list-style-type: none"> ➤ compare different kinds of rocks based on their appearance <p>Grouping Rocks</p> <ul style="list-style-type: none"> ➤ group different kinds of rocks on the basis of their physical properties ➤ understand that rocks can be classified into three types (igneous, sedimentary and metamorphic) depending on how they are formed ➤ know that rocks do not consist of a single substance but contain many different types of minerals and are created over millions of years <p>Fossils</p> <ul style="list-style-type: none"> ➤ understand how fossils are formed in sedimentary rocks <p>Soils</p> <ul style="list-style-type: none"> ➤ soils are formed when rocks are broken down by weathering ➤ soil is a combination of rocks, minerals, organic matter (plant and animal materials), air and water ➤ soils have different properties depending on the rocks from which they are formed, the climate and organic matter contained in them ➤ soil consists of different layers formed over bedrock
<p style="text-align: center;">LIGHT</p> <p style="text-align: center;">Working Scientifically Assessment Task - Materials and Shadows</p>	
<p style="text-align: center;">Key Vocabulary</p> <p>light, light source, dark, absence of light, transparent, translucent, opaque, shiny, matt, surface, shadow, reflect, reflection, reflective, mirror, sunlight, ray, dangerous, pupil, retina, opaque, translucent, transparent</p>	

Working Scientifically Skills	Knowledge
<p>Planning</p> <ul style="list-style-type: none"> ➤ set up simple practical enquiries, comparative and fair tests <p>Obtaining and presenting evidence</p> <ul style="list-style-type: none"> ➤ make systematic and careful observations ➤ gather and record data in a variety of ways ➤ record and present findings using drawings, labelled diagrams, keys, tally charts, Carroll diagrams, Venn diagrams, bar charts and tables ➤ report on findings <p>Considering and evaluating evidence</p> <ul style="list-style-type: none"> ➤ with help, uses results to draw simple conclusions ➤ use straightforward scientific evidence to 	<p>National Curriculum Requirements</p> <ul style="list-style-type: none"> ➤ recognise that they need light to see things and that dark is the absence of light ➤ notice that light is reflected from surfaces and recognise that light from the sun can be dangerous and that there are ways to protect their eyes ➤ recognise that shadows are formed when the light from a light source is blocked by a solid object ➤ find patterns in the way that the size of shadows change <p>Lesson Breakdown:</p> <p>Light and Dark</p> <ul style="list-style-type: none"> ➤ recognise that we need light in order to see things and that dark is the absence of light by taking part in a 'feely bag' investigation <p>Reflective Surfaces</p> <ul style="list-style-type: none"> ➤ notice that light is reflected from surfaces by choosing the most reflective material for a new book bag <p>Marvellous Mirrors</p> <ul style="list-style-type: none"> ➤ notice that light is reflected from surfaces by playing mirror games <p>Sun Safety</p> <ul style="list-style-type: none"> ➤ recognise that light from the sun can be dangerous and that there are ways to protect our eyes by designing and advertising a pair of sunglasses or a sun hat

answer questions or to support their findings	<p>Making Shadows</p> <ul style="list-style-type: none"> ➤ recognise that shadows are formed when the light from a light source is blocked by a solid object by investigating the best material for curtains for a baby's bedroom <p>Changing Shadows</p> <ul style="list-style-type: none"> ➤ find patterns in the way that the size of shadows change by investigating what happens when you change the distance between the object and the light source
<p style="text-align: center;">FORCES AND MAGNETS</p> <p style="text-align: center;">Working Scientifically Assessment Task - Magnet Investigation and / or Shoe Grip</p>	
<p style="text-align: center;">Key Vocabulary</p> <p>force, friction, surface, push, pull, twist, contact force, non-contact force, magnet, magnetic, magnetic field, strength, bar magnet, ring magnet, horseshoe magnet, attract, repel, magnetic material, metal, iron, steel, north pole, south pole</p>	
Working Scientifically Skills	Knowledge
<p>Planning</p> <ul style="list-style-type: none"> ➤ set up simple practical enquiries, comparative and fair tests <p>Obtaining and presenting evidence</p> <ul style="list-style-type: none"> ➤ take accurate measurements using standard units using a range of equipment 	<p>National Curriculum Requirements</p> <ul style="list-style-type: none"> ➤ notice that some forces need contact between two objects but magnetic forces can act at a distance ➤ observe how magnets attract or repel each other and attract some materials and not others ➤ compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet and identify some magnetic materials ➤ describe magnets as having two poles and predict whether two magnets will attract or repel each other, depending on which poles are facing

<ul style="list-style-type: none"> ➤ gather and record data in a variety of ways ➤ record and present findings using drawings, labelled diagrams, keys, tally charts, Carroll diagrams, Venn diagrams, bar charts and tables ➤ report on findings <p>Considering and evaluating evidence</p> <ul style="list-style-type: none"> ➤ with help, uses results to draw simple conclusions ➤ use straightforward scientific evidence to answer questions or to support their findings ➤ with support, use results to suggest improvements to what they have done 	<p>Lesson Breakdown:</p> <p>Pushes and Pulls</p> <ul style="list-style-type: none"> ➤ notice that some forces need contact between two objects by identifying the different types of forces acting on objects <p>Faster and Slower</p> <ul style="list-style-type: none"> ➤ compare how things move on different surfaces by investigating the speed of a toy car over different surfaces <p>Magnetic Strength</p> <ul style="list-style-type: none"> ➤ observe how magnets attract or repel each other and attract some materials and not others by investigating the strength of different magnets ➤ notice that magnetic forces can act at a distance and attract some materials and not others by sorting materials ➤ compare and group materials according to whether they are magnetic by sorting materials <p>Magnetic Poles</p> <ul style="list-style-type: none"> ➤ describe magnets as having two poles and to predict whether two magnets will attract or repel each other, depending on which poles are facing
---	---
